ABOUT PODA LIFESTYLE

Poda Lifestyle is actively engaged in the global commercialization of HNB smoking products, which have the potential to reduce the risks associated with combustible smoking products. The Company has developed a patented HNB system that uses proprietary biodegradable single-use pods, which are both consumer and environmentally friendly. The innovative design of the Company's HNB platform prevents cross-contamination between the heating devices and the pods, eliminating all cleaning requirements and providing users with the most convenient and enjoyable potentially-reduced-risk smoking experience. Poda Lifestyle's HNB system is fully patented in Canada and is patent pending in over 60 additional countries, covering almost 70% of the global population. The Company's Poda Pods are the first and only cigarettes to have a completely closed end. This exclusive design eliminates all cleaning requirements and provides a truly ashless HNB cigarette. Poda Lifestyle's fully patented system is one of a kind and solves the major pain-point that ALL other HNB products suffer from: daily cleaning requirements. The Company's flagship **Beyond Burn™** Poda Pods contain a unique tobacco-free blend of pelletized tea leaves infused with synthetic nicotine, which provides adult smokers with a smoke-free alternative to their regular habit without sacrificing satisfaction. **Beyond Burn™** Poda Pods have been expertly crafted to mimic the sensorial experience of traditional cigarettes without the smoke, without the smell, and without the tobacco.
