ABOUT PODA LIFESTYLE

Poda Lifestyle is actively engaged in the global commercialization of heat-not-burn ("HNB") smoking products, which have the potential to reduce the risks associated with combustible smoking products. The Company has developed a patented HNB system that uses proprietary biodegradable single-use pods, which are both consumer and environmentally friendly. The innovative design of the Company's HNB platform prevents cross-contamination between the heating devices and the pods, eliminating all cleaning requirements and providing users with the most convenient and enjoyable potentially-reduced-risk smoking experience. Poda Lifestyle's HNB system is fully patented in Canada and is patent pending in over 60 additional countries, covering almost 70% of the global population. The Company's Poda Pods are the first and only cigarettes to have a completely closed end. This exclusive design eliminates all cleaning requirements and provides a truly ashless HNB cigarette. Poda Lifestyle's fully patented system is one of a kind and solves the major pain-point that ALL other HNB products suffer from: daily cleaning requirements. The Company's flagship **Beyond Burn™** Poda Pods contain a unique tobacco-free blend of pelletized tea leaves infused with synthetic nicotine, which provides adult smokers with a smoke-free alternative to their regular habit without sacrificing satisfaction. **Beyond Burn™** Poda Pods have been expertly crafted to mimic the sensorial experience of traditional cigarettes without the smoke, without the smell, and without the tobacco.
